

SECURITY OPERATION SOLUTIONS

OVERVIEW

Today's leading organizations need to protect themselves against the most advanced cyber threats but lack the internal resources to address the high costs, complexity, and additional personnel that are required to build an impactful security operations center. While many IT departments have deployed security tools in an attempt to address this, the lack of 24x7 coverage, extensive security operations expertise, and a well-staff security team means many threats go unnoticed and can linger in your environment for months.

IntraSystems' highly experienced security team in conjunction with Arctic Wolf solutions can provide strategic recommendations uniquely customized for your environment. Powered by threat telemetry spanning endpoint, network, and cloud sources, the Arctic Wolf Security Operations Cloud ingests and analyzes trillions of security events each week to enable critical outcomes for most security use cases.

Did you know that the Arctic Wolf Concierge Security Team has found latent threats lingering in 73% of customers' environments within the first 90 days of engagement? Preparation is your best defense against cyber-attacks!

WHY ARCTIC WOLF?

Arctic Wolf solutions installs in minutes and immediately begins monitoring your environment – ensuring proactive and dynamic detection and response to threats, intrusions, and attacks. Organizations receive timely and actionable intelligence – without the overwhelming noise of endless false positives.

▪ Managed Detection & Response

ABOUT US

IntraSystems is a highly respected IT consulting company, managed services provider, and systems integrator that specializes in the deployment and delivery of IT infrastructure, security, virtualization services, and cloud solutions. IntraSystems has the proven expertise in solving the many technology challenges that companies face today, such as keeping up with the ever-evolving security landscape, migrating to the cloud, and compliance requirements (i.e. GDPR, HIPAA, etc.).

IntraSystems delivers customer satisfaction through technical competence, prominent partnerships, and professional integrity of all employees. Because our specialized core knowledge and experience is difficult to duplicate, we can offer customers a trusted relationship with the highest level of personalized service in the industry. The IntraSystems team combines in-house expertise and the highest level of business partnerships to allow your organization to get on with your core business.

We review your business priorities and your environment - seeking the right combination of technical skills and technology to suit your unique situation. Recommending, customizing, and implementing IT configurations form the backbone of our key strengths. Over the years, these services and our long-standing reputation of technological and business integrity have merited an impressive list of satisfied customers. Naturally, we take our responsibility very seriously. It's an approach that works well in everyday situations — and it's precisely what drives our success.
