

KEY SOLUTIONS FROM INTRASYSTEMS

CYBERSECURITY SERVICES

Don't leave your business vulnerable to data breaches and malicious attacks! IntraSystems' portfolio of cybersecurity services provides both proactive and preventive security solutions to ensure your organization's network and data is free of security vulnerabilities. We aim to reduce the risk of cyber-attacks and protect our clients against the unauthorized exploitation of systems, networks, and technologies. IntraSystems provides various cybersecurity assessments and health checks; email security; identity management; detection & response services; and patching and endpoint protection services (and more!).

SUITE OF CLOUD SERVICES

IntraSystems improves your business by reducing costs, minimizing risks, and enhancing security. You gain the benefits of a shared IT infrastructure without having to implement or manage it directly. Your IT staff can focus on business growth – instead of daily maintenance responsibilities and support of mission-critical activities. Whether you need us to proactively manage your network, securely host desktops and applications or protect mission-critical applications and systems in a private, public, or hybrid cloud, IntraSystems has the resources to deploy these solutions (and more!) to you – all on a monthly, reoccurring basis.

CLOUD ASSESSMENTS

The first step in migrating your organization to the cloud is to confirm if your infrastructure and business is ready to make the move. To do this, IntraSystems provides a Cloud Assessment of your infrastructure. IntraSystems will assess the readiness of your infrastructure to move to the cloud; identify gaps in current capabilities to deliver on your cloud vision; and make you aware of changes that will happen from a business perspective.

SECURITY SERVICES

IntraSystems develops policy-based security procedures for all aspects of corporate IT environments. After an analysis of network and business requirements, IntraSystems implements a series of tools to best-fit customers' individual security needs. At IntraSystems, we don't "trust" any packets, network traffic, and data....we reduce the temptation for insiders to abuse or misuse your network and we improve your chances of discovering cybercrime before it can succeed. IntraSystems performs Security Audits, Network Assessments, PEN Testing, as well as offers a wide range of security services to fit your needs.

MICROSOFT SERVICES

As a **Microsoft Gold Certified Partner and Direct Reseller** with extensive experience in on premise and cloud-based implementations, assessments, upgrades, and migrations, IntraSystems provides services for Azure Site Recovery, Azure Active Directory; AD Hardening; AD Health and Security Checks; Lift and Shift; Fast Start for Azure IAAS; Backup; Disaster Recovery; EMS; IaaS/PaaS; and Security. IntraSystems' engineers maintain competencies and certifications in the related Microsoft applications and technologies.

MANAGED SERVICES

IntraSystems' Managed Services is designed to provide your organization with proactive support services that anticipate and prevent IT problems before they occur so that you can reduce the risk of network failure or outages. Services are provided on a 24x7 or 8x5 basis and include monitoring, alerting, full problem troubleshooting and remediation. We can help you maintain performance and reliability while adding ongoing reporting.

HELP DESK SERVICES	Our IT Help Desk services provide reliable, round-the-clock support (24x7) or tailored business hours coverage (8x5) to meet your organization's needs. With a team of skilled technicians, we quickly resolve technical issues, minimize downtime, and ensure seamless operations. From troubleshooting hardware and software problems to assisting with user account management and network connectivity, we deliver responsive, efficient, and customer-focused service.
VIRTUAL CIO/CISO	IntraSystems' Virtual CIO/CISO Service is ideal for organizations that don't want the expense of a full time CIO/CISO or don't have the time or expertise to get the most out of their IT environment with their current staff. IntraSystems partners with you to give you the benefits of an in-house Virtual CIO/CISO, but without the costs of a full-time employee. Specializing in cybersecurity and cloud solutions, IntraSystems has the technical expertise and experience to manage all your IT needs.
STAFF AUGMENTATION	When periodic short and long-term staffing is required to complete project tasks, IntraSystems' consultants can be contracted at cost-effective rates to meet the specific needs of the customer. Not only are all our consultants highly certified, they also have the full backing of IntraSystems' internal support engineering team – giving you more than just a single resource! With a broad range of experience in all aspects of design, migrations, and full deployments, IntraSystems' consultants have specialized expertise in developing comprehensive network integration solutions as well as supporting and maintaining your environment.
SUPPORT & MAINTENANCE	IntraSystems' support team (available on an 24x7 or 8x5 basis) is comprised of three (3) key teams: IntraSystems' Consulting Team; Deployment and Installation Team, and Inside Technical Support Team. IntraSystems is unique in that our teams work together to provide the most comprehensive support available. Moreover, utilizing leading edge remote diagnostic tools, our support engineers have first-hand, real-time knowledge of your environment.

ABOUT US

Founded in 1996, IntraSystems is a highly respected IT consulting/advisory firm, managed services provider, and systems integrator with SOC 2 and ISO 27001 certifications. Specializing in IT infrastructure deployment, cybersecurity services and assessments, virtualization, security, and cloud solutions, IntraSystems excels at addressing today's complex technology challenges. From navigating the rapidly evolving security landscape to cloud migration and meeting compliance standards like GDPR and HIPAA, IntraSystems delivers proven expertise and tailored solutions every time.

IntraSystems ensures customer satisfaction through technical expertise, strong partnerships, and the professional integrity of every team member. With specialized knowledge and experience that is hard to replicate, we build trusted relationships and deliver the industry's highest level of personalized service. By combining in-house expertise with top-tier business partnerships, IntraSystems empowers your organization to focus on its core business priorities.

We assess your business priorities and environment to identify the ideal combination of technical expertise and technology tailored to your unique needs. Recommending, customizing, and implementing IT solutions are at the core of our strengths. Over the years, our commitment to service and our reputation for technological and business integrity have earned us an extensive list of satisfied clients. We take our responsibility very seriously. It's an approach that works well in everyday situations — and it's precisely what drives our success.
