# HOW SECURE IS YOUR NETWORK?

**intra protect**
Cybersecurity Services

## OVERVIEW

**Uncover security risks to your organization.** Your corporate network offers access to valuable and sensitive information …information that must never fall into the wrong hands.  Can you be sure there aren't any hidden "surprises" threatening your most precious data assets? No stealthy malware, back doors, data leaks or other security vulnerabilities? Early exposure to hidden threats will enable you to immediately address these risks and enhance security. With IntraSystems, you can uncover security risks threatening your organization.

**IntraSystems' Security Checkup** is an assessment identifying security risks on your enterprise network. At the end of the assessment, we provide a comprehensive threat analysis report. A security expert will go over this report with you, which includes all  the security incidents detected during the assessment and recommendations on how to protect against these threats. Our experts will be your advisor, to help you address any security issues and make your organization more secure.

IntraSystems Security Report includes:

- Malware infected computers
- Access to high risk web applications and websites
- Exploited vulnerabilities and attacks on your network
- Data leakage incidents
- Recommendations to protect your network from these risks

## FULL RANGE OF SECURITY RISKS

IntraSystems' Security Checkup Assessment covers a full range of security risks:

- High risk web applications and websites used by employees such as:  P2P File Sharing applications, Proxy anonymizers, File Storage applications, malicious website, and MORE!

- Analysis of malware threats including computer infected with bots, viruses, and unknown malware (zero day attacks and malware that cannot be detected by traditional anti-virus systems)

- Exploited vulnerability of servers and computers in the organization – indicating possible attacks

- Sensitive data sent outside the organization via emails or the web

- Bandwidth analysis identifying the top bandwidth consuming applications and accessed websites to understand who and what is hogging your network bandwidth

# ONSITE ASSESSMENT

As a best-in-class security partner with leading-edge training and the most advanced skills in these areas, you can count on us to receive the highest technical skill and expertise available in the marketplace.

IntraSystems' Security Experts will conduct an onsite assessment that includes four main steps:

**ONSITE ASSESSMENT**

1. **IntraSystems Security Gateway Setup** – The security expert sets up the IntraSystems Security Gateway upon which the assessment will be conducted.

2. **Inspect Network Traffic** – The device arrives onsite. Once plugged into the organization's network, it begins to inspect network traffic. In order to ensure a thorough inspection, we recommend monitoring traffic for at least a week. The longer the time period of inspection, the better.

3. **Results Analysis** – After removing the device from the network, IntraSystems' security expert analyzes the results and generates the Security Checkup report.

4. **Findings Report** – The security expert will present the findings that identify weak points in the network. Then, they will go over what security technologies and solutions may be best for you to protect your network against these threats.

# ABOUT US

IntraSystems is a highly respected IT consulting company, managed services provider, and systems integrator that specializes in the deployment and delivery of IT infrastructure, virtualization services, security, and cloud solutions. IntraSystems has the proven expertise in solving the many technology challenges that companies face today, such as keeping up with the ever-evolving security landscape, migrating to the cloud, and compliance requirements (i.e. GDPR, HIPAA, etc.).

IntraSystems delivers customer satisfaction through technical competence, prominent partnerships, and professional integrity of all employees. Because our specialized core knowledge and experience is difficult to duplicate, we can offer customers a trusted relationship with the highest level of personalized service in the industry. The IntraSystems team combines in-house expertise and the highest level of business partnerships to allow your organization to get on with your core business.

We review your business priorities and your environment - seeking the right combination of technical skills and technology to suit your unique situation. Recommending, customizing, and implementing IT configurations form the backbone of our key strengths. Over the years, these services and our long-standing reputation of technological and business integrity have merited an impressive list of satisfied customers. Naturally, we take our responsibility very seriously. It's an approach that works well in everyday situations — and it's precisely what drives our success.
